

教程：安装Selenium自动化

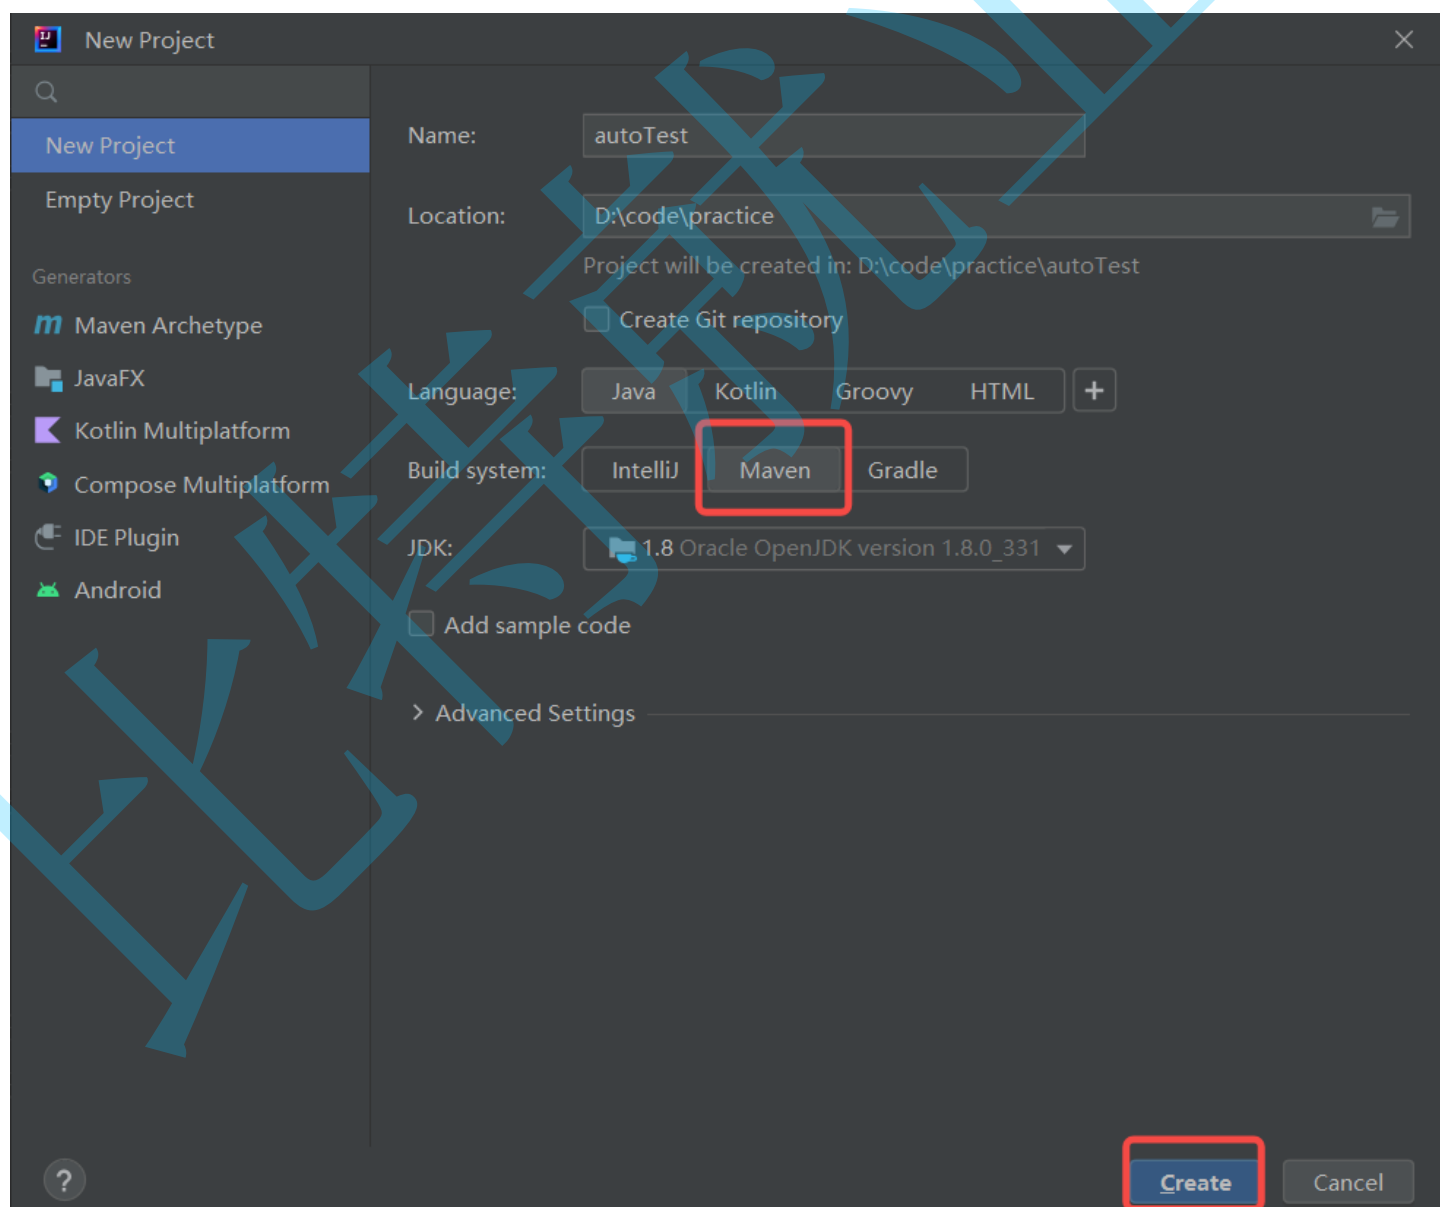

前提：

java版本最低要求为8

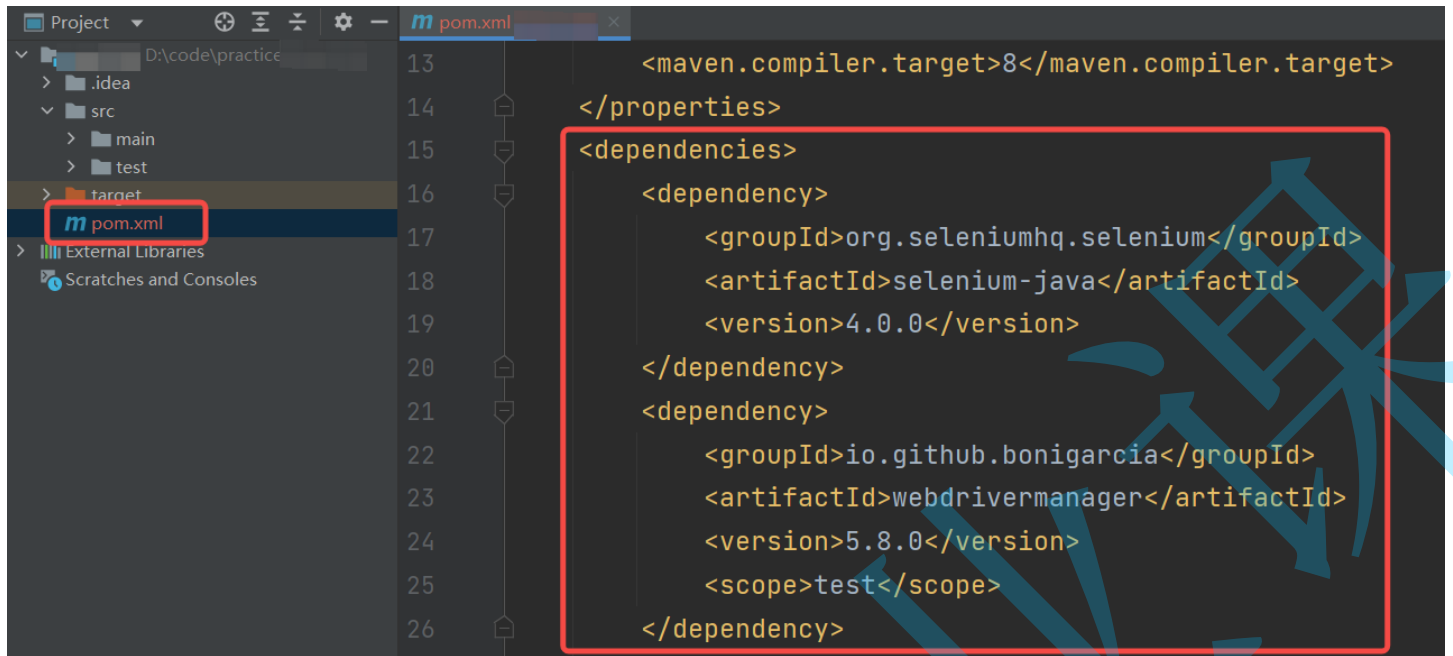

电脑至少已安装一种浏览器，如：**Chrome（推荐）**、Edge、Firefox、IE、Safari（课堂以Chrome浏览器演示）

提示：浏览器必须为官网下载的正版浏览器，根据以往经验，存在部分同学电脑安装的浏览器为盗版，导致无法执行自动化

1. 打开intellij idea，创建Maven项目

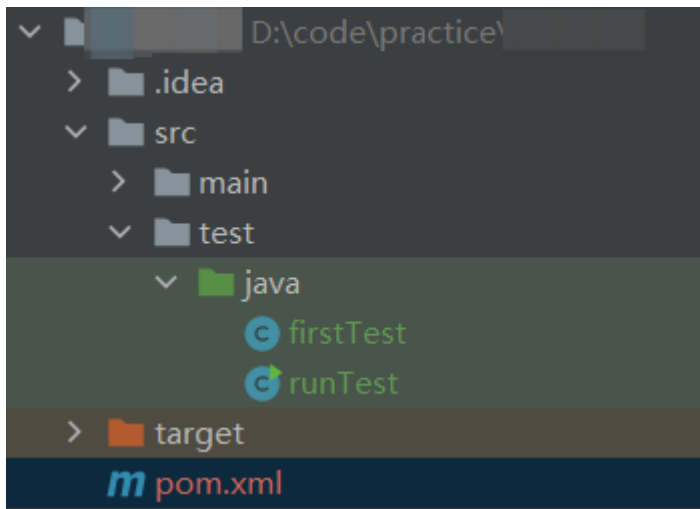

2. 添加依赖

```
1 <dependencies>
2   <dependency>
3     <groupId>org.seleniumhq.selenium</groupId>
4     <artifactId>selenium-java</artifactId>
5     <version>4.0.0</version>
6   </dependency>
7   <dependency>
8     <groupId>io.github.bonigarcia</groupId>
9     <artifactId>webdrivermanager</artifactId>
10    <version>5.8.0</version>
11    <scope>test</scope>
12  </dependency>
13 </dependencies>
```

3. 在Test路径下创建自动化文件

1) 项目结构

2) 代码

firstTest.java

```
1 public class firstTest {
2     void searchTest()
3     {
4         //使用插件管理工具webdrivermanager
5         WebDriverManager.chromedriver().setup();
6
7         //添加浏览器配置
8         ChromeOptions options = new ChromeOptions();
9         //1) 允许任何来源的远程连接
10        options.addArguments("--remote-allow-origins=*");
11
12        //创建浏览器驱动对象
13        ChromeDriver driver = new ChromeDriver(options);
14        //访问百度网页，搜索“比特科技”
15        driver.get("https://www.baidu.com");
16        driver.findElement(By.cssSelector("#kw")).sendKeys("比特科技");
17        driver.findElement(By.cssSelector("#su")).click();
18        //退出
19        driver.quit();
20    }
21 }
```

runTest.java

```
1 public class runTest {
2     public static void main(String[] args) {
3         firstTest test = new firstTest();
4         test.searchTest();
5     }
6 }
```

```
5     }  
6 }
```

4. 运行自动化

点击运行，程序将自动实现百度搜索全过程。

```
Run: runTest x  
Please see https://chromedriver.chromium.org/security-considerations for suggestions on keeping ChromeDriver safe.  
ChromeDriver was started successfully.  
四月 19, 2024 3:17:30 下午 org.openqa.selenium.remote.ProtocolHandshake createSession  
信息: Detected dialect: W3C  
四月 19, 2024 3:17:30 下午 org.openqa.selenium.devtools.CdpVersionFinder findNearestMatch  
警告: Unable to find an exact match for CDP version 124, so returning the closest version found: a no-op implementation  
四月 19, 2024 3:17:30 下午 org.openqa.selenium.devtools.CdpVersionFinder findNearestMatch  
信息: Unable to find CDP implementation matching 124.  
四月 19, 2024 3:17:30 下午 org.openqa.selenium.chromium.ChromiumDriver lambda$new$3  
警告: Unable to find version of CDP to use for . You may need to include a dependency on a specific version of the CDP using  
something similar to `org.seleniumhq.selenium:selenium-devtools-v86:4.0.0` where the version ("v86") matches the version of  
the chromium-based browser you're using and the version number of the artifact is the same as Selenium's.  
  
Process finished with exit code 0
```

自动化运行成功
